

EXHIBIT 5

1 "Happy day... Now we use Discover as a forcing
 2 function."
 3 Then he forwards an email from Mr Lucini which is
 4 referring to notes from a meeting. Then it says
 5 underneath that:
 6 "We will followup actions for Discover."
 7 The first question I have on this is Discover was an
 8 internal HP event, is that right?
 9 A. No, it is -- Discover is a customer event.
 10 Q. But an HP event for customers?
 11 A. Correct.
 12 Q. Thank you.
 13 If we then go to {K25/405.02/1}.
 14 A. We don't have that either.
 15 Q. Right. It should be on the screen now. This is the
 16 notes of the meeting which were attached to that earlier
 17 email we saw. If we can just go to page 2
 18 {K25/405.02/2}, you will see that it lists the various
 19 participants in the meeting, including Mr Veghte,
 20 Dr Menell, Mr Gallagher, Mr Blanchflower, Mr Kanter and
 21 Mr Lucini. Then over the page you will see that it
 22 talks about -- it says "Immediate deliverables" and the
 23 idea is that it would be possible essentially to use
 24 connectors which would enable Vertica then to make use
 25 of information from other products, other repositories.

41

1 But this wasn't concerned with, as it were, a full
 2 integration of Vertica and IDOL into a unified platform,
 3 is it?
 4 A. So I'm not exactly sure what they're driving at here,
 5 but when we decided not to integrate Vertica into
 6 Autonomy, in large part because there was a significant
 7 revolt among the Vertica management team to work for
 8 Mike, because of his autocratic leadership style and the
 9 fact that they really had a reaction to Mike and his
 10 leadership style, we did not give up on the vision of
 11 structured and unstructured data and putting it
 12 together. What it seems like this document is, is
 13 a meeting in May after we had decided not to integrate
 14 Vertica into Autonomy and it is the beginning, or the
 15 middle, or some portion of how these two organisations
 16 were going to bring their technology together to realise
 17 the vision. That's my understanding of this document.
 18 Q. But in fact, I think you agreed earlier on, HP never
 19 succeeded in creating the unified platform that had been
 20 envisaged by Mr Apotheker, did it? It never brought
 21 together IDOL and Vertica into a unified product?
 22 A. So, I don't know what exactly happened between Vertica
 23 and Autonomy after Mike left. I don't know what
 24 happened to this notion of these two things in this
 25 document. But I know in May of this year, evidently the

42

1 teams were working together to try to realise that
 2 vision. And this is May I think, is that right?
 3 Q. Yes. But it never in fact happened, did it? They never
 4 created a unified product?
 5 A. You know, I don't actually know what happened after this
 6 meeting. But this looks like a pretty good start to me.
 7 Q. Well, if you don't know, you don't know. Do you know --
 8 you're not able to say that the Autonomy product, IDOL,
 9 and the Vertica product were ever put together into an
 10 integrated solution?
 11 A. Not that I know of, but there were a lot of events that
 12 transpired between this and, you know, say a year from
 13 this timeframe.
 14 Q. You were the CEO of this company. You would have known,
 15 because it would have been a big launch, if such
 16 a product had been developed, wouldn't you?
 17 A. I don't know whether it was.
 18 Q. Well, you would expect to know, wouldn't you? You would
 19 have been behind the launch of it?
 20 A. I would have expected to know, but what I will tell you
 21 is -- and you know this -- is the events post earnings
 22 in May, the report of the whistleblower, the
 23 investigation and the announcement of the accounting
 24 improprieties and other challenges with Autonomy, may
 25 have -- this may have been overtaken by events.

43

1 Q. You've just given a whole list of things but not
 2 answered my question. You would expect to know,
 3 wouldn't you, if there had been a launch of a unified
 4 Autonomy/Vertica product; you would have expected to
 5 know that?
 6 A. I would have expected to know that, that's correct.
 7 Q. And you do not recall, you've got no evidence that any
 8 such product ever was launched, have you?
 9 A. Not that I recall, no.
 10 MR MILES: Thank you.
 11 My Lord, is that a good moment for a break?
 12 MR JUSTICE HILDYARD: Yes. We'll have one of our five,
 13 sometimes ten-minute breaks.
 14 (11.39 am)
 15 (A short break)
 16 (11.54 am)
 17 MR MILES: Ms Whitman, HP's first quarter 2012 ended on
 18 31 January, didn't it, 2012?
 19 A. That's correct.
 20 Q. We've already seen -- perhaps we'll have another look at
 21 this at {K25/159/4}, in the third bullet point, that
 22 with the exception of HPFS, the Q1 results for business
 23 groups were below budget across the board, so every unit
 24 except HPFS came out under budget?
 25 A. That's correct.

44
